**POSITION ANNOUNCEMENT # 00033901
REQUISITION # 40905**

- Title:** Assistant Professor – Invertebrate Vectors of Disease and Public Health
- Location:** Entomology & Nematology Department
Institute of Food and Agricultural Sciences (IFAS)
University of Florida
Gainesville, Florida
- Salary:** Commensurate with Qualifications and Experience
- Review Date:** For full consideration, candidates should apply and submit additional materials by 15 January 2019 (short-listed candidates notified in February). The position will remain open until a viable applicant pool is determined.

The Entomology & Nematology Department (IFAS) at the University of Florida seeks candidates for a tenure-accruing position (9 months) in Invertebrate Vectors of Disease and Public Health at the Assistant Professor rank. This position will be 60% teaching (College of Agricultural and Life Sciences) and 40% research (Florida Agricultural Experiment Station). The appointee will contribute to a growing departmental reputation for excellence in teaching undergraduate and graduate students. In addition, the appointee will develop an internationally-recognized and extramurally-funded program on invertebrate vectors of pathogens causing diseases of medical and veterinary importance.

Duties and Responsibilities

This is a 9-month, tenure-accruing position that will be 60% teaching (College of Agricultural and Life Sciences) and 40% research (Florida Agricultural Experiment Station), available in the Entomology & Nematology Department, Institute of Food and Agricultural Sciences, at the University of Florida. This assignment may change in accordance with the needs of the unit.

Teaching responsibilities will include annual delivery of three courses: a large enrollment, general-interest undergraduate course focused on public health, parasitology and pathogen transmission with the goal of attracting students with interests in medical or veterinary sciences into an entomology major; an online combined undergraduate/graduate course focused on insect and wildlife interactions; an online combined undergraduate/graduate introductory course on

The Foundation for The Gator Nation

An Equal Opportunity Institution

identification of mosquito, tick and other arthropod vectors of medical and veterinary importance.

The successful candidate will engage in scholarly activities related to instruction, including teaching undergraduate and/or graduate courses, advising and mentoring undergraduate and graduate students, participating in curriculum revision and enhancement, seeking funding for the teaching program, supervising undergraduate and graduate research and creative work, publishing teaching-related scholarship, producing learning tools, and engaging in professional development activities related to teaching and advising. Faculty are encouraged to support and participate in the CALS Honors Program, distance education, and international education.

Assigned research responsibilities will include developing an internationally-recognized research program focused on public health as it relates to pathogen transmission cycles by arthropods and/or nematodes. Possible areas of research could include, but are not limited to, the biology, epidemiology, ecology, behavior, and integrated control of disease vectors, vector-host interactions and zoonotic diseases. Research could focus on natural or human-influenced environments, including agricultural or urban ecosystems. The research description is intentionally broad to increase the applicant pool.

Tenure will accrue in the Entomology & Nematology Department. The faculty member will participate actively in undergraduate education and graduate education by chairing graduate committees, serving on graduate committees, supervising thesis and dissertation research, supervising undergraduate research, and publishing the results with their graduate students. The faculty member will actively seek contract and grant funding to support their research program.

Because of the IFAS land-grant mission, all faculty are expected to be supportive of and engaged in all three mission areas—Research, Teaching and Extension—regardless of the assignment split specified in the position description.

Qualifications

Required:

A doctorate (Ph.D. or foreign equivalent acceptable) in entomology, nematology, parasitology, ecology, or a closely related discipline with demonstrated training and expertise in public health and disease vectors is required. Candidates must have evidence of collaborative research, a strong commitment to teaching, and promotion of a diverse educational and professional environment. Candidates should have demonstrated skills in verbal and written communication, interpersonal relationships, and procurement of extramural funding. Candidates must be supportive of the mission of the Land-Grant system. Candidates must also have a commitment to IFAS core values of excellence, diversity, global involvement, and accountability.

Preferred:

Preferred qualifications/attributes: 1) a productive research program, building towards a 40% research appointment at an R1 academic institution, and 2) experience teaching medical or veterinary entomology/nematology or related topics. Topical expertise can be demonstrated by activities such as publications in peer-reviewed journals, teaching of courses and workshops,

The Foundation for The Gator Nation

An Equal Opportunity Institution

student mentoring experience and/or philosophy, national and international recognition for research productivity, and the securing of research funding.

Postdoctoral experience is desirable.

Background Information:

The University of Florida (<http://www.ufl.edu>) is a Land-Grant, Sea-Grant, and Space-Grant institution, encompassing virtually all academic and professional disciplines, with an enrollment of more than 53,000 students. UF is a member of The Association of American Universities. The Institute of Food and Agricultural Sciences (<http://ifas.ufl.edu>) includes the College of Agricultural and Life Sciences (<http://cals.ufl.edu>), the Florida Agricultural Experiment Station (<http://research.ifas.ufl.edu>), the Florida Cooperative Extension Service (<http://extension.ifas.ufl.edu>), the College of Veterinary Medicine (<http://www.vetmed.ufl.edu>), the Florida Sea Grant program (<http://www.flseagrant.org/>), and encompasses 16 on-campus academic departments and schools, 12 Research and Educational Centers (REC) located throughout the state, 6 Research sites/demonstration units administered by RECs or academic departments, and Florida Cooperative Extension Service offices in all 67 counties (counties operate and maintain). The School of Natural Resources and Environment is an interdisciplinary unit housed in IFAS and managed by several colleges on campus. IFAS employs over 2500 people, which includes approximately 900 faculty and 1200 support personnel located in Gainesville and throughout the state. IFAS, one of the nation's largest agricultural and natural resources research and education organizations, is administered by a Senior Vice President and four deans: the Dean of the College of Agricultural and Life Sciences, the Dean for Extension and Director of the Florida Cooperative Extension Service, the Dean for Research and Director of the Florida Agricultural Experiment Station, and the Dean for the College of Veterinary Medicine. UF/IFAS also engages in cooperative work with Florida A&M University in Tallahassee.

The Entomology and Nematology Department (<http://entnemdept.ufl.edu/>) has diverse teaching, research, and extension programs with 32 faculty members located on main campus in Gainesville and 38 faculty located at 11 Research and Education Centers throughout the state. Faculty members located at the Emerging Pathogens Institute and the Florida Medical Entomology Laboratory provide a critical mass of expertise in medical/vector entomology. The Department has access to excellent resources, including the nearby 3,600-hectare Ordway-Swisher Biological Station, managed by the Office of the IFAS Dean of Research, which provides an outdoor laboratory for teaching and a site for long-term field research, and has been designated to serve as a National Science Foundation NEON core site. Department faculty may choose to be affiliated with the Genetics Institute, Center for Latin American Studies, Center for African Studies, and the School of Natural Resources and the Environment, for example. Several units on or nearby the University of Florida campus complement the teaching and research programs of the Department, including The Florida Climate Institute; the Tropical Conservation and Development Program in the Center for Latin American Studies; Wildlife Conservation Society; Center for Natural Resources; Center for Wetlands; Center for Biological Conservation; Pre-eminence initiatives in Bioinformatics and Biodiversity; Florida Museum of Natural History; Northeast Regional Data Center; National Ecology Laboratory (Sirenia) of USGS; Florida Field Station (Gainesville) of the U.S.D.A. Wildlife Research Laboratory;

Southeastern Forest Experiment Station unit of the U.S. Forest Service; The Nature Conservancy; the Wildlife Research Laboratory of the Florida Fish and Wildlife Conservation Commission; and others. Agriculture is the number two industry in Florida after tourism, and there is an abundance of opportunities to work in managed agricultural and natural resource ecosystems. Agriculture is the number two industry in Florida after tourism, and there is an abundance of opportunities to work in managed agricultural and natural resource ecosystems.

Florida boasts a diversity of fauna and flora common to both southern temperate and subtropical climates and is replete with springs, rivers, backwater streams, lakes, freshwater and saltwater marshes, mangrove fringes, cypress swamps, hardwood hammocks, sandhills, scrub, pine flatwoods, and rangeland. Gainesville is a small city with culture and character directly linked to the university. Attributes of Gainesville include proximity to many natural areas and many cultural and historical landmarks. Cost of living in Gainesville is slightly below the national average, making it an attractive place to live.

Employment Conditions

This position is available July 01, 2019 and will be filled as soon thereafter as an acceptable applicant is available. Compensation is commensurate with the education, experience, and qualifications of the selected applicant.

Nominations

Nominations are welcome. Nominations need to include the complete name and address of the nominee. This information should be sent to:

Application Information

- Individuals wishing to apply should go online to <http://apply.interfolio.com/57816> and submit:
 - Cover letter that clearly states applicant's interest in the position and qualifications relative to the required and preferred qualifications listed above
 - Full Curriculum vitae
 - A statement of teaching/mentoring philosophies (2-page limit)

The Foundation for The Gator Nation

An Equal Opportunity Institution

- A description of current and projected research (2-page limit)
- At least three letters of reference preferably from those who can speak to the applicant's research, teaching and mentoring experiences

The selected candidate will be required to provide an official transcript to the hiring department upon hire. A transcript will not be considered "official" if a designation of "Issued to Student" is visible. Degrees earned from an education institution outside of the United States are required to be evaluated by a professional credentialing service provider approved by [National Association of Credential Evaluation Services \(NACES\)](http://www.naces.org/), which can be found at <http://www.naces.org/>.

If an accommodation due to a disability is needed to apply for this position, please call 352-392-2477 or the Florida Relay System at 800-955-8771 (TDD). Hiring is contingent upon eligibility to work in the US. Searches are conducted in accordance with Florida's Sunshine Law.

The University of Florida is an Equal Opportunity Institution dedicated to building a broadly diverse and inclusive faculty and staff.
